

New Jersey Immunization Network

**Protecting Health
For Life**

A community baby shower is to celebrate and support mothers-to-be in underserved communities by providing them with essential resources, information, and a supportive network as they prepare for the arrival of their babies. It aims to empower mothers, promote health and well-being, foster connections among community members, and create a positive and nurturing environment for mothers and their families. A community baby shower serves as a way to show love, care, and solidarity with expecting mothers, ensuring they feel celebrated and supported during this special time in their lives. Additionally, The New Jersey Immunization Network offers a sense of community and family to parents before and after the birth of their baby. Our target communities of the underserved and uninsured will receive educational materials in English and Spanish and access to resources that are available to them in their communities. Additionally, guests will receive food and refreshments, giveaway items, and a chance to win large raffle prizes. Our community baby showers are a celebration of life, an opportunity for learning, and a chance to bring together communities as we help to prepare new parents for the coming of their child.
